TO: The Commission

# REPLY COMMENTS OF FOLSE PRODUCTIONS, INC.

Folse Productions, Inc. ("Folse") by its undersigned Counsel hereby states its Reply Comments to certain Comments filed in response to the <u>Sixth Notice of Proposed Rulemaking</u> on Advanced Television Service. Folse is the Licensee of Low Power Television ("LPTV") Stations K30EM, Houma, Louisiana and K07UT, Morgan City, Louisiana.<sup>1</sup>

Notwithstanding that LPTV Stations are classified as "secondary" services, some LPTV stations provide vital local programming, including news and information, that is not available otherwise. Folse's Houma station, K30EM, is such a station.<sup>2</sup> It is licensed to serve Houma, Louisiana, a

<sup>&</sup>lt;sup>1</sup>As the licensee of a LPTV station, which may be vulnerable to being "bumped" from its allocation as the Commission substitutes Advanced Television ("ATV") for the present NTSC system, Folse clearly has standing to advance these Reply Comments.

 $<sup>^2</sup>$ Folse's Morgan City station rebroadcasts K30EM so as to better cover the bayou area.

community to which no "full power" station is licensed. The nearest "full power" television stations are in Baton Rouge and New Orleans. These cities are too far from Houma, and Houma is too remote and isolated from these cities for television stations licensed to Baton Rouge and New Orleans to cover anything other than the most of news stories in Houma and the area surrounding Houma. Folse's LPTV station, however covers the news in Houma and the surrounding area on a daily basis.

Were K30EM to be forced off the air, the residents of Houma and the surrounding area would be deprived of the area's only local television broadcast news operation.<sup>3</sup> This would hardly represent either a step forward or a furtherance of the public interest for residents of Houma and the surrounding areas.

The strong public interest in continuation of K30EM and K07UT are demonstrated in the attached letter from the local governing body.

Therefore, Folse urges that the public interest demands that LPTV stations, certainly those such as K30EM and K07UT that broadcast local news and programming, be protected from being forced off the air by ATV stations.

Folse understands that at least one proposal before the Commission would result in elimination of some or all of the VHF television channels and / or some of the UHF television

 $<sup>^3</sup>$ The loss of K07UT would impact Morgan City particularly hard because of the \_\_\_\_\_ more remote location of Morgan City.

channels. Unless all existing authorized stations, including LPTV stations, are adequately accommodated, adoption of such a proposal to shrink the spectrum constituting the television broadcast bands would be patently contrary to the public interest.

Folse is aware of the peculiar problems faced by Non-Commercial, Educational FM ("NCE-FM") stations with respect to VHF-TV channel six stations. Folse believes that an allotment plan can be crafted which would alleviate the technical limitations imposed on NCE-FM stations by not using VHF-TV channel six but insure continued service to Houma by K30EM and to Morgan City by K07UT and to other communities by similar, local service, LPTV stations.

Therefore, with the exception of VHF television channel six, for which special concerns exist with respect to non-commercial, educational FM stations, Folse strongly urges the Commission not to delete any spectrum currently allocated to the Television Broadcast Service unless all existing LPTV stations are adequately accommodated.

Respectfully Submitted

FOLSE PRODUCTIONS, INC.

### OFFICE OF THE PRESIDENT Terrebonne Parish Consolidated Government

P.O. BOX 6097 HOUMA, LOUISIANA 70361

BARRY P. BONVILLAIN PARISH PRESIDENT

January 9, 1997

(504) 873-6401 FAX: (504) 873-6409

TO:

**Federal Communications Commission** 

FROM:

Barry P. Bonvillain **Parish President** 

RE:

**Lower Power Television** 

It is with great concern that I write you to ask that you consider all possible remedies to make sure the LPTV Channel 30 (K30EM) of Houma and Channel 07 (K07UT) of Morgan City remain on the air in co-existence with advanced digital television.

Before these low power stations aired local programming to our citizens, we were neglected by the high power New Orleans and Baton Rouge stations. It wasn't until our local stations covered our area that our citizens even new what was happening in our back yard.

Both Channel 30 and Channel 07 have served our citizens tremendously in matters of civil defense in hurricane situations, as well as local news on a daily basis which informs the public of their city. Their children's programs are reaching out to our area children in a manner we have never experienced before. They have even organized an intern program for the local high schools to participate in news gathering, editing and on-air participation.

Please make every effort to ensure that our low power stations remain here for the areas that are out of the "Big City" coverage. Our smaller cities deserve and need coverage of our news events.

I hope that my plea does not fall on deaf ears. It is with hope that I ask for your utmost consideration.

Sincerely

Barry P. Bonvillain

Bullan

Parish President
